SUMMARY

I'm a B.Tech Computer Science student specializing in Full Stack Development with a passion for graphic design, UI/UX, and frontend development. Eager to learn and grow, I'm excited to gain hands-on experience in these fields.

EDUCATION

THE NORTHCAP UNIVERSITY

2022-2026

B. TECH CSE

- Specialized in Full-Stack Development
- CGPA :- 7.6

D.A.V Public School

2022

10th & 12th Passed

- Percentage Secured: 78% Stream
- Pursued: Non-Medical

PROJECTS

- Collaborated with my university to design and develop a fully functional **Lost & Found website**, utilizing Figma for design and React.js for implementation, ensuring an optimal user experience.
- I participated in the Smart India Hackathon 2024, developing an innovative application for the Ministry of Electronics and Information Technology using the MERN Stack and advanced technologies to safeguard user's personal data. Key features include real-time PII detection, automatic data masking, blockchain audit trails, and a user-friendly dashboard for data management.
- I created **Send Notes**, a note-sharing platform that enhances academic journeys by providing high-quality handwritten notes, tailored syllabus materials, and expert-reviewed previous year question papers. With a responsive design and AI integration for instant answers, users can study effectively across devices while tracking their academic progress through LMS integration.
- Collaborated with senior professionals on a startup project, **Property Yatra**, where I led the complete UI/UX design of the website and contributed significantly to frontend development.
- Participated in a hackathon where we developed a **Disaster Management System** featuring SOS alerts, AI-based damage detection, donation support, rescue mapping, and a live admin dashboard. Built using MERN Stack, PyTorch, Google Maps API, Firebase, and Tailwind CSS. Also created a vlog covering the entire hackathon experience.
- Currently building a startup, **RIGHT FIGHT** — a unique, modern matchmaking app for fighters, designed using React Native and AI integration. Focused on revolutionizing connections in combat sports, bringing a fresh concept to the market.

WORK EXPERIENCE

GDGC Graphic & Content Lead

Oct 2023 - Present

- Now serving as the Lead for Google Developer Group Community (GDGC), where I oversee and manage content and design strategies to enhance community engagement. Previously contributed as a Graphic Designer for Google Developer Student Club (GDSC), creating impactful posts and flyers for social media to boost audience interaction and visibility.
- Organized several tech events with GDGC, including a UI/UX design workshop on campus, highlighting my passion for design. Contributed to Google Developer Gurugram's Android Study Jam 2.0, engaging 60+ students nationwide and boosting tech community involvement.

Astro Pathshala

Jun 2016 - Present

- Managed various operations at Astro Pathshala, including HR management, conducting interviews, accounting, and customer relations. Demonstrated expertise in SEO, graphic design, data management, and record keeping. Played a key role in enhancing the website interface and creating content for the main site. Successfully managed applications like Graphy and Classplus for mobile platforms, significantly boosting profits through online course offerings.

College Events

2022 - Present

- Served as a Content Creator for The Optica International Society, producing engaging reels for events. Coordinated as a Graphic Designer for the university's cultural fest, boosting audience participation. Provided design support for college events, enhancing visual branding.
- Developed the official website for Engage Hackathon under the Momentum Annual Fest, which successfully attracted over 200+ registrations.

Content Creator

Mar 2025 - Present

- Creating content on YouTube, including tech-related videos, vlogs, tutorials on video editing and photo editing, and event coverage. Recently produced a vlog on tech events and a website launch trailer featuring new tech stacks.
- Managing posts and ad campaigns across Pinterest, LinkedIn, and Instagram as the creative head for branding.

PropertyYatra

Jan 2025 - Present

- Collaborated with senior professionals on a startup project, Property Yatra, where I led the complete UI/UX design of the website. I actively contributed to frontend development, working closely with experienced mentors to solve real-world technical challenges.

KEY SKILLS

- Frontend Development: Proficient in HTML, CSS, and JavaScript, with a basic understanding of React.js.
- UI/UX Design : Using Figma for mobile and web development layout and designs.
- Graphic Design : Skilled in adobe photoshop, adobe premiere pro and adobe after effects.
- Proficient in Java, C, and Python at a foundational level.
- Experienced in providing technical support and effectively managing customer inquiries and concerns.
- Proficient in Microsoft Office applications such as Word, Excel, and PowerPoint.
